

## Introduction

Healthcare shouldn't be confusing, overpriced, or delayed. At Concord Health Integrated, we practice Direct Primary Care (DPC), a model that puts you-not insurance companies-at the center of care. Here's how DPC actually saves you money.

### 1. No Insurance Middlemen

No billing departments. No coding. No copays. Your monthly fee covers all visits, saving you money on every appointment.

### 2. Unlimited Visits = Early Prevention

You don't delay care because of cost, so we catch issues early-before they turn into ER bills, hospitalizations, or expensive specialists.

### 3. Deeply Discounted Labs & Medications

We've negotiated discounted cash rates on blood tests, imaging, and generic meds. You pay a fraction of what you'd pay with insurance.

### 4. No Surprise Bills

You'll never get a mystery bill weeks later. No deductibles, no hidden fees-just clarity.

### 5. Telehealth Access Included

Most issues can be handled virtually, saving you trips to urgent care and time off work.

### 6. Avoid Unnecessary ER Visits

Most ER visits are avoidable with proper access to your doctor. DPC gives you direct communication and quick visits that prevent costly emergencies.

### 7. Peace of Mind = Fewer Financial Surprises

Knowing you can see your doctor anytime without extra cost gives you security, control, and long-term savings.
